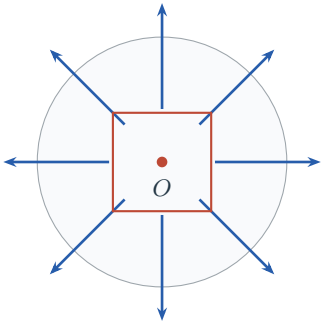
M1-08 线性径向场的小盒通量



六个面的通量相加；图示 $a>0$ 的截面

$$\mathbf{A} = a(x,y,z)$$

$$\partial_x A_x = \partial_y A_y = \partial_z A_z = a$$

$$\Phi_{\partial V} = 3aV$$

$\nabla\cdot\mathbf{A} = 3a$，与盒子大小无关。
