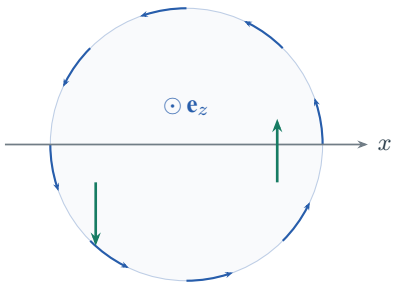
例：线性场的环量等于圆盘面积



C 逆时针，$\hat{\mathbf{n}} = +\mathbf{e}_z$

$$\mathbf{A} = x\mathbf{e}_y$$

$$\nabla \times \mathbf{A} = \mathbf{e}_z$$

$$\oint_C \mathbf{A} \cdot d\mathbf{l} = \int_S 1\, dS = \pi R^2$$
