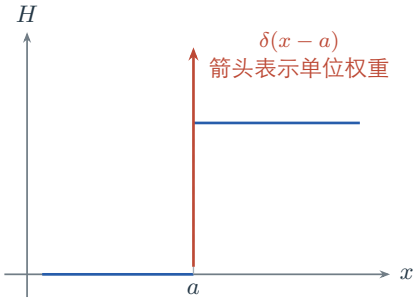
阶跃的分布导数与界面跳跃



$$\frac{d}{dx}H(x-a) = \delta(x-a)$$

$$F = F^{-} + [F]H(x-a)$$
$$F' = (F')_{\text{reg}} + [F]\delta(x-a)$$

曲面界面：

$$\nabla F = (\nabla F)_{\text{reg}} + [F]\hat{\mathbf{n}}\,\delta_S$$
