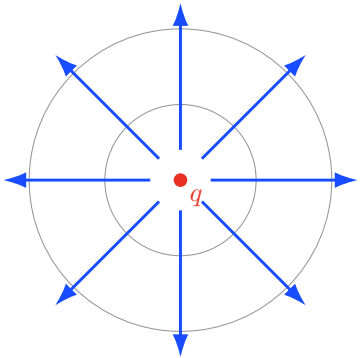
点电荷：原点外解拉普拉斯方程，小球通量确定系数

球对称高斯面



$$r>0:\ \nabla^2\varphi=0\Rightarrow\varphi=C_1/r+C_2$$

$$\varphi(\infty)=0\Rightarrow C_2=0;\ 4\pi r^2E_r=q/\varepsilon_0$$

$$\varphi=\frac{q}{4\pi\varepsilon_0 r},\quad \mathsf{E}=\frac{q}{4\pi\varepsilon_0 r^2}\mathsf{e}_r$$
