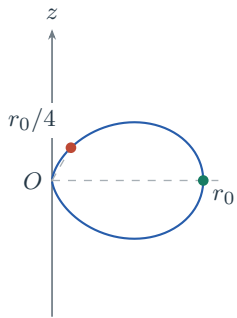
M2-020 同一偶极场线上半径随极角变化



$$r = C\sin^2\theta$$

$$\theta = \pi/2 \quad \Rightarrow \quad C = r_0$$

$$r(30^\circ) = r_0\sin^2 30^\circ = r_0/4$$

只画右侧子午面场线；极角从 $+z$ 轴量起。
