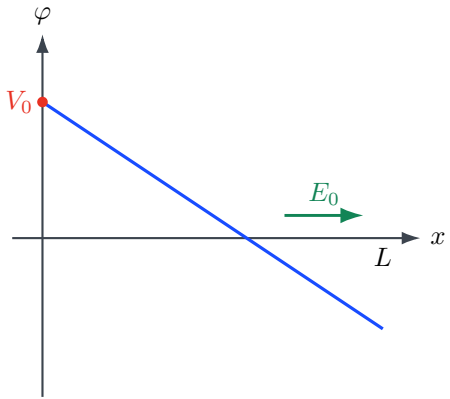
一维混合边界：一端定势、一端定场共同确定线性电势



$$\nabla^2\varphi = 0 \Rightarrow \varphi = A + Bx$$

$$\varphi(0) = V_0,\ E_x(L) = -\varphi'(L) = E_0 \Rightarrow \varphi = V_0 - E_0 x$$

差值 $w'' = 0,\ w(0) = 0,\ w'(L) = 0$，故 $w \equiv 0$。
