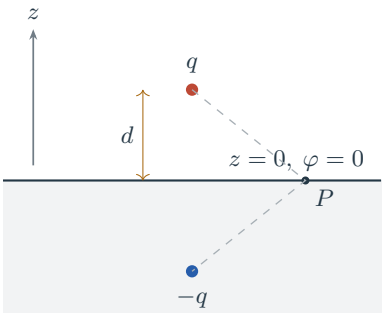
M2-099 平面像电荷逐点抵消边界电势



灰区是辅助像源区域；候选势只在真实半空间有效。

$$q' = -q, \quad z' = -d$$

$$\varphi = \frac{q}{4\pi\varepsilon_0}\left(\frac{1}{R_+} - \frac{1}{R_-}\right)$$

$$P \in \{z = 0\}: \; R_+ = R_- \Rightarrow \varphi = 0$$
