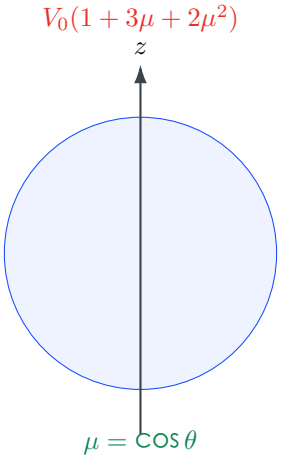
球内轴对称边值：先投影到勒让德模态，再按相同阶数延拓径向幂



$$1+3\mu+2\mu^2=\frac{5}{3}+3P_1(\mu)+\frac{4}{3}P_2(\mu)$$

$$\varphi=V_0\left[\frac{5}{3}+3\frac{r}{R}P_1(\mu)+\frac{4}{3}\left(\frac{r}{R}\right)^2P_2(\mu)\right]$$

球心只剩常数模态，$\varphi(0)=5V_0/3$。
