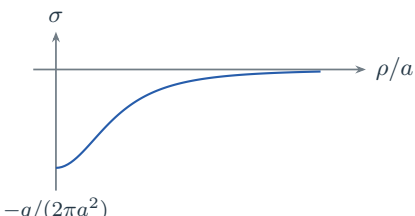
M2-180a 面电荷剖面与同心环积分

$q > 0$ 时整个平面感应电荷为负；曲线向远处趋零。



$$\sigma(\rho) = -qa/[2\pi(\rho^2 + a^2)^{3/2}]$$

$$dQ = \sigma(\rho)\, 2\pi\rho\, d\rho$$

$$Q_{\text{ind}} = -q$$
