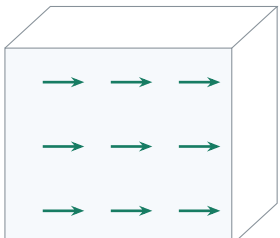
M3-002 由平均分子偶极矩求极化强度

宏观小体积 ΔV



$N\Delta V$ 个分子；箭头为平均偶极矩

$$\mathbf{P} = \frac{\sum \mathbf{p}_i}{\Delta V} = N\langle \mathbf{p} \rangle$$

$$\mathbf{P} = 6.0 \times 10^{-2} \mathbf{e}_x \ \mathrm{C/m^2}$$
