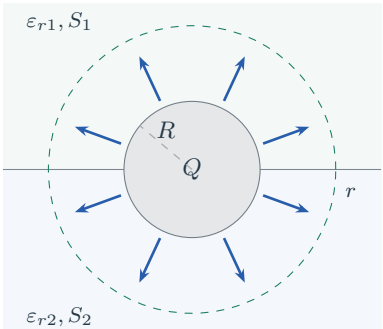
M3-016 介质平面上的带电导体球



界面过球心；每个半球面积 $2\pi r^2$

界面上 $E_{1n} = E_{2n} = 0$

$E_{1t} = E_{2t}$

$$2\pi r^2(D_1 + D_2) = Q$$

$$\mathbf{E} = \frac{Q\mathbf{e}_r}{2\pi\varepsilon_0(\varepsilon_{r1}+\varepsilon_{r2})r^2}$$
