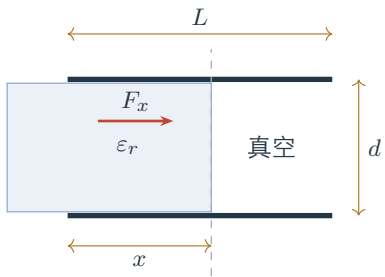
M3-032a 断开电源处的连续条件

I：接恒压源 V_0；II：断开后 Q_* 固定



纸面外宽 w；$+x$ 沿插入方向向右

$x_* = L/2$：$C_* = (\varepsilon_r + 1)C_0/2$

$Q_* = C_* V_0$

断开瞬间 C, Q, V, F 连续

断开之后：$Q = Q_*$

$V(x) = Q_*/C(x)$ 随 x 降低
