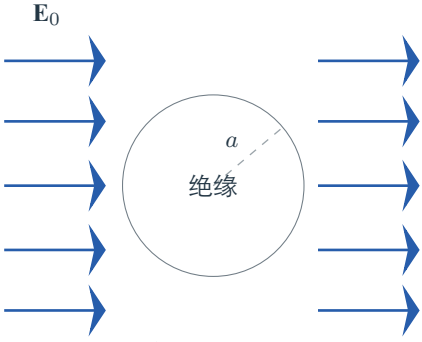
M4-020 绝缘球腔：法向电流为零



球面上 $J_n = 0$

子午截面中 $+z$ 向右；腔内无传导电流不等于无电场

$$r = a : \quad J_n = 0$$

$$\varphi_{\text{out}} = -E_0\left(r + a^3/2r^2\right)\cos\theta$$

$$\mathbf{E}_{\text{in}} = \frac{3}{2}\mathbf{E}_0$$
