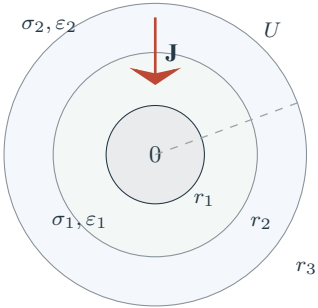
M4-023 两层漏电介质中的径向电流



中间圆表示介质界面；所有面密度采用同一径向顺序

$$\mathbf{J} = -I\mathbf{e}_r/(4\pi r^2)$$

$$\mathbf{E}_i = \mathbf{J}/\sigma_i$$

$$\sigma_f = \mathbf{n} \cdot (\mathbf{D}_{\text{out}} - \mathbf{D}_{\text{in}})$$
