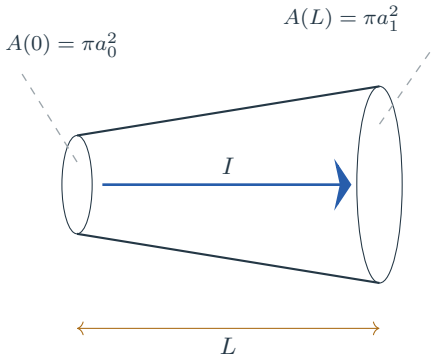
M4-085 缓变圆锥台：截面积决定电流密度和发热



准一维模型；窄端电流密度与单位体积发热率较大

$$a(x) = a_0 + (a_1 - a_0)x/L$$
$$A(x) = \pi a(x)^2$$

$$J(x) = I/A(x)$$

$$p_J(x) = J(x)^2/\sigma$$
