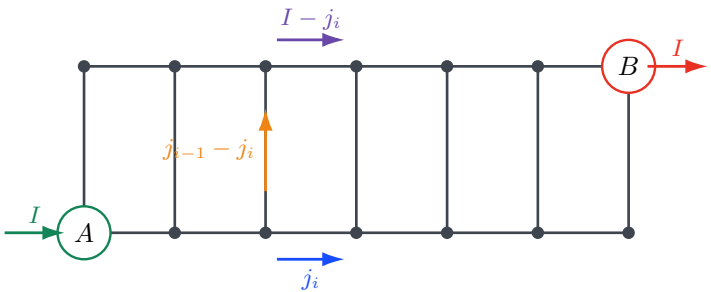
斜接有限梯形：同一竖直截面的总电流恒为 I



$$j_{i-1} - 4j_i + j_{i+1} = -I$$

虚拟边界

$$j_0 = I, \quad j_{N+1} = 0$$

$$U_{AB} = r\left(\sum_{i=1}^{N} j_i + j_N\right)$$

端口换到对角点后，差分方程出现常数项；特征根仍为 $2 \pm \sqrt{3}$。
