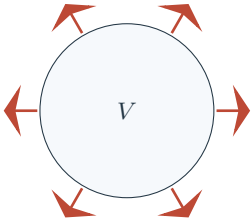
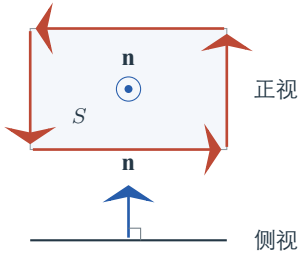
闭合面外法向与开曲面边界正向



闭合面 ∂V：统一取外法向

$$\iint_{\partial V} \mathbf{A} \cdot d\mathbf{S}$$

闭合面只有外法向约定，不需要指定边界绕向



从法向朝向的一侧正视，边界为逆时针

$$\oint_{\partial S} \mathbf{A} \cdot d\mathbf{l}$$

开曲面：边界正向与法向满足右手定则
