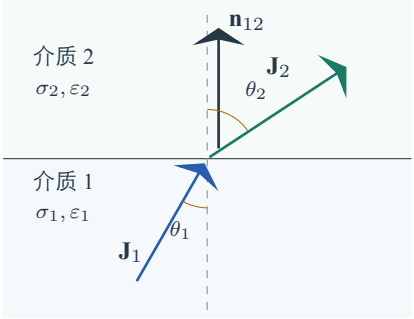
导电界面：法向电流连续，切向电场连续



$$J_{1n} = J_{2n}, \quad E_{1t} = E_{2t}$$

$$\tan\theta_1 / \tan\theta_2 = \sigma_1/\sigma_2$$

$$\sigma_s = J_n(\varepsilon_2/\sigma_2 - \varepsilon_1/\sigma_1)$$

图示 $\sigma_2 > \sigma_1$；角度均从法线量起
