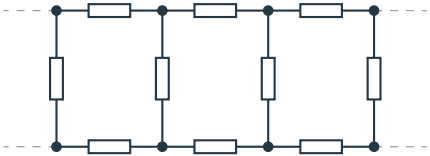
双排无限条带：同相与反相模式



$$u_0 = (1,1)^{\mathsf{T}}/\sqrt{2}, \quad \mu_0 = 0$$

$$u_1 = (1,-1)^{\mathsf{T}}/\sqrt{2}, \quad \mu_1 = 2$$

反相衰减根：$\rho = 2 - \sqrt{3}$

每条实线支路含一只 r；左右两端都向无穷延伸
