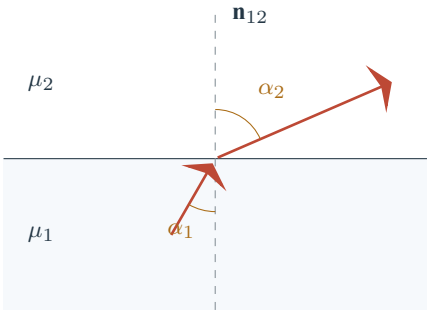
M5-036 磁力线折转的角度



$\mathbf{K}_f = 0$；角度从法线量起

$$\tan\alpha_2 = (\mu_2/\mu_1)\tan\alpha_1$$

$$\mu_2 = 4\mu_1, \quad \alpha_1 = 30^\circ$$

$$\alpha_2 = \arctan(4/\sqrt{3}) \simeq 66.6^\circ$$
