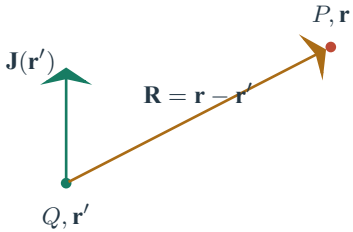
# M5-066 从矢势积分解推出毕奥-萨伐尔定律



B 的方向来自 $\mathbf{J} \times \mathbf{R}$

$$\nabla(1/R) = -\nabla'(1/R)$$

$$\nabla \cdot \mathbf{J} = 0 \text{ 且源局域}$$

$$\mathbf{B} = \frac{\mu_0}{4\pi} \int \frac{\mathbf{J} \times \mathbf{R}}{R^3} dV'$$
