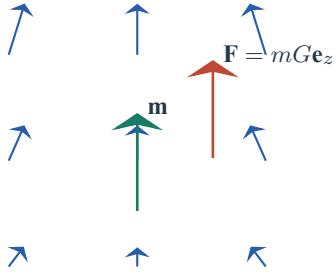
M5-068 无源梯度场与固定磁偶极子



$$\nabla \cdot \mathbf{B} = -G/2 - G/2 + G = 0$$

$$\nabla \times \mathbf{B} = 0$$

$$\mathbf{F} = mG\mathbf{e}_z, \quad \boldsymbol{\tau}(O) = 0$$

$G > 0$：轴向增强、横向汇聚；原点 $\tau = 0$
