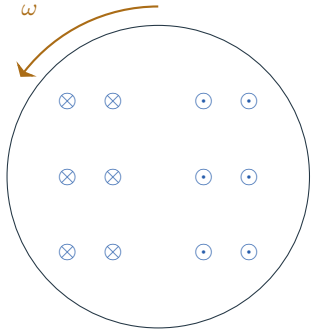
M5-108 转动磁场图样的一个正则内区电场



$t=0$：$B_z = B_0 x$；图样绕中心转动

$$B_z = B_0(x\cos\omega t + y\sin\omega t)$$

$$\nabla \times \mathbf{E} = -\partial_t B_z \mathbf{e}_z$$

E 仍可叠加正则调和梯度场
