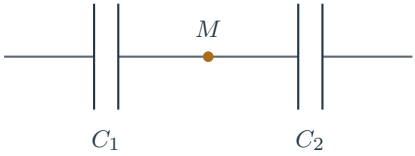
# M5-123 串联电容的初始电荷条件

孤立中间节点：$Q_M = -q_1 + q_2$



$M$ 不与其他支路或电源连接

$$Q_M = -q_1 + q_2 = \text{常量}$$

$$Q_M = 0 \Rightarrow q_1 = q_2$$

$$C_{\text{diff}} = C_1C_2/(C_1 + C_2)$$
