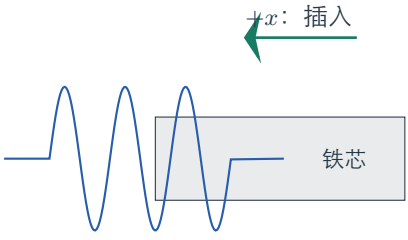
M5-130 固 定 磁 链 下 的 力



连续绕组，$L = L(x)$；电流参考为 i

$$\Psi = \Psi_0, \quad i = \Psi_0 / L(x)$$

$$W_m = \Psi_0^2 / [2L(x)]$$

$$F_x = -(\partial W_m / \partial x)_{\Psi} = \Psi_0^2 L' / (2L^2)$$
