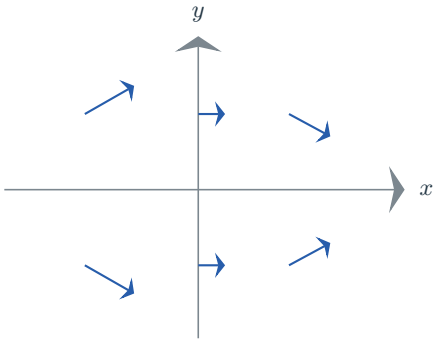
M5-108a 转动图样在t=0时的一个二次场



二次场方向：$E_x \geq 0$，E_y 随 xy 变号

$$t = 0: \quad E_x = A(x^2 + 3y^2)$$

$$E_y = -2Axy, \quad A = B_0\omega/8$$

$$\nabla \cdot \mathbf{E} = 0, \quad (\nabla \times \mathbf{E})_z = -B_0\omega y$$
