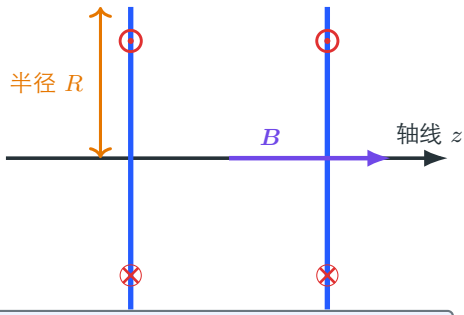
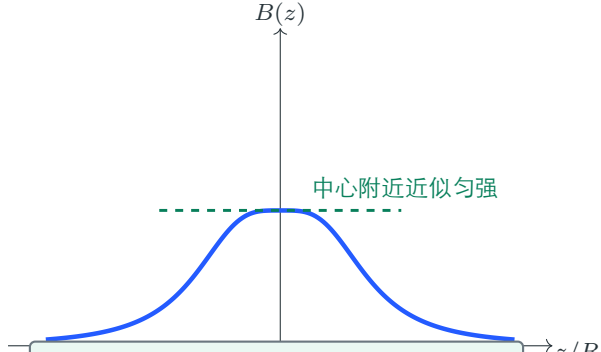
亥姆霍兹线圈：线圈间距等于半径时，中心场最平坦

两只同轴圆线圈，电流方向相同



对称性自动给出 $B'(0)=0$；选择 $d=R$ 还能使 $B''(0)=0$

轴线场在中心附近的形状



$$B(0) = \left(\frac{4}{5}\right)^{3/2} \frac{\mu_0 N I}{R}$$
