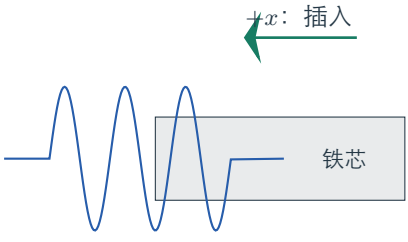
理论图 可变电感的电端口功率分配



连续绕组，$L = L(x)$；电流参考为 i

$$ui = Li\dot{i} + i^2 L'(x)\dot{x}$$

$$\dot{W}_m = Li\dot{i} + \tfrac{1}{2} i^2 L'(x)\dot{x}$$

$$F_x\dot{x} = \tfrac{1}{2} i^2 L'(x)\dot{x}$$
