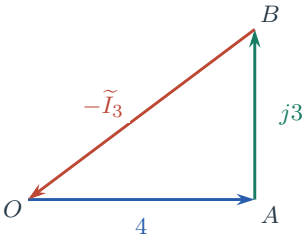
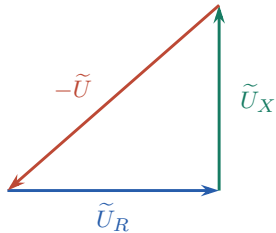
基尔霍夫定律对应有向多边形闭合





$\widetilde{I}_3 = 4 + j3$ A

KVL：$\widetilde{U}_R + \widetilde{U}_X - \widetilde{U} = 0$

左：$\widetilde{I}_1 + \widetilde{I}_2 - \widetilde{I}_3 = 0$，沿合相量反向回到起点；右：电压有向闭合。
