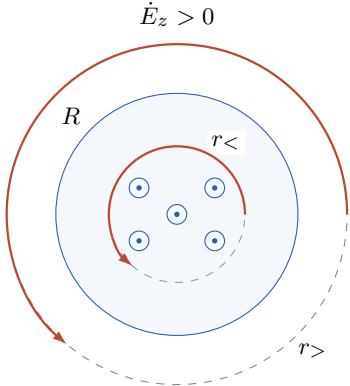
M7-027 充电圆形极板周围的磁场



$B_\phi > 0$：逆时针

$$B_\phi = \frac{\mu_0 \varepsilon_0 r}{2} \dot{E} \quad (r < R)$$

$$B_\phi = \frac{\mu_0 \varepsilon_0 R^2}{2r} \dot{E} \quad (r > R)$$

真空板间；逆时针磁场对应 $\dot{E}_z > 0$。
