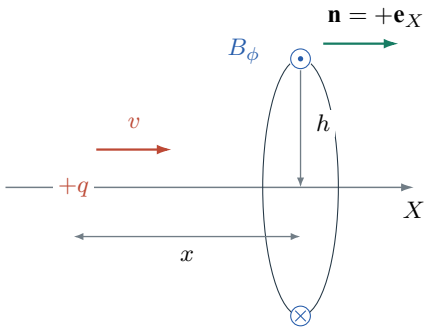
M7-029 移动点电荷的位移电流检验



圆面 $X = 0$

$$\Phi_E = \frac{q}{2\varepsilon_0}\left(1 - \frac{x}{\sqrt{x^2+h^2}}\right)$$

$$B_\phi = \frac{\mu_0 q v h}{4\pi(x^2+h^2)^{3/2}}$$

$x > 0, \dot{x} = -v$；低速瞬时库仑近似 $v \ll c$。
