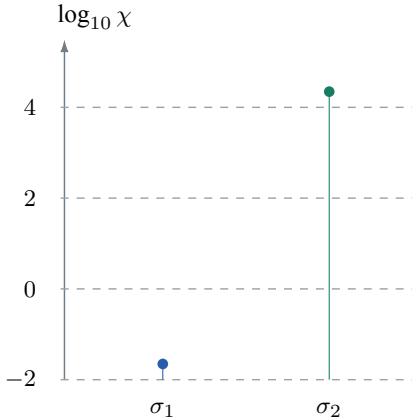
M7-062　两类准静态近似的判断



$$\sigma_1 = 10^{-2} \ : \ \chi_1 = 0.0222$$

$$\sigma_2 = 10^{-8} \ : \ \chi_2 = 2.22 \times 10^{4}$$

$\chi = |J_d|/|J_c|$；两种介质共用对数纵轴，$\chi < 1$ 为传导占优。
