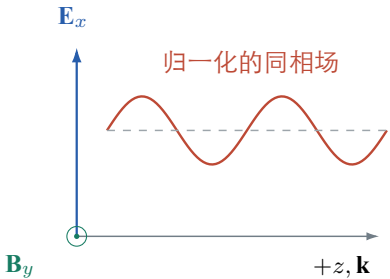
M7-065　题 1　真空平面电磁波的能量流



$$u_E = u_B = \tfrac{1}{2}\varepsilon_0 E^2$$

$$\mathbf{S} = cu\mathbf{e}_z, \quad \langle S \rangle = \tfrac{1}{2}\varepsilon_0 c E_0^2$$

同一点电场与磁场同相；能流随两场平方变化。
